Cocktail Station Plus S

○ Small size,
BIG PERFORMANCE:
a 1m unit with all-in-one
functionality for bartending
essentials

Production stages

- Our station, with adjustable height, utilizes AISI 304 stainless steel for surfaces and AISI 430 for robust structural integrity.
- All our products are precisely laser-cut and bent on the CNC Abkant.
Our laser is a precision force, and concurrently, it stands as one of the biggest investment tool in our arsenal.
This distinction underlines the exceptional quality of our products, setting them apart from those that do not incorporate this technology.
- We are using the TIG / WIG welding process witch is characterized by excellent quality due to the protection offered by inert gas (argon).
The argon weld is not covered with slag and no cleaning of the welded joint is required.
- All these stages are produced by our team in our workshop.

No.	Name
1	Cutting board
2	Speed Rail / bottles rack
3	Ice Bin (split in 2 with removable separator)
4	Gastronorm (GN) zone (4 x 1/9)
5	Rinser
6	Sink
7	Shelf for extra storage

Plus+ S is the smallest Cocktail Station that we produce (L1000mm x W600mm x H900mm), yet in just 1 meter, it provides everything you need for a small bar, restaurant, or coffee shop.

The **cutting board** provides a sturdy surface for slicing fresh ingredients, helping bartenders craft delicious cocktails with ease.

We've chosen to integrate a cutting board into our cocktail station that is robust, durable, and non-slip.

The **rinser** keeps glasses clean and sparkling, ensuring your drinks look as good as they taste.

Pouring into a moistened glass is smoother, and this bar glass rinser facilitates serving beverages as they should be served – in a cold and clean glass.

Facilitating easy access to essential ingredients! Our **bottle rack/ speed rail** strategically keeps key spirits within arm's reach of the bartender, directly within the cocktail station. Ensuring secure placement and convenient accessibility for swift service.

Guaranteeing your drinks are always served ice-cold, our **ice bin** provides essential accessibility for crafting the perfect beverages. With the added convenience of a removable divider, which allows you to have two types of ice in the same bin, this storage space is indispensable for any cocktail station, ensuring that ice is always within easy reach of the bartender's hand.

Gastronorm area

- Positioned above the ice bins for constant freshness.

- The Gastronorm containers are size 1/9.

- The containers can be arranged in groups of four vertically

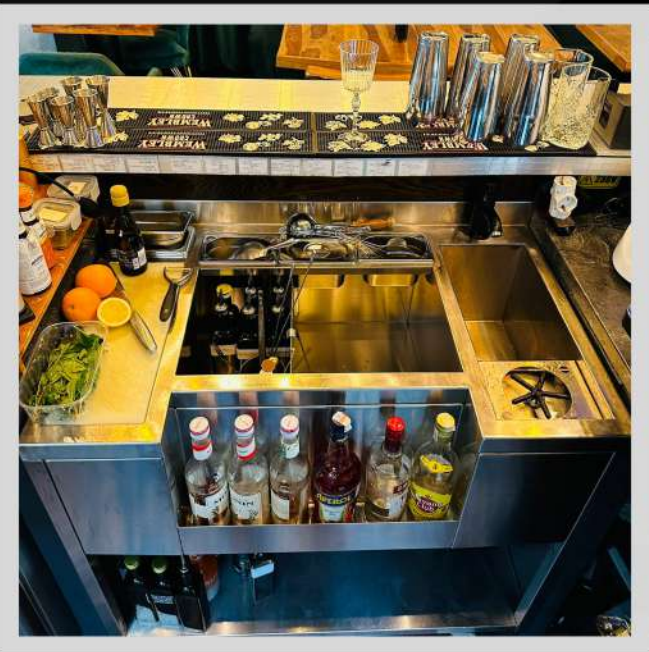

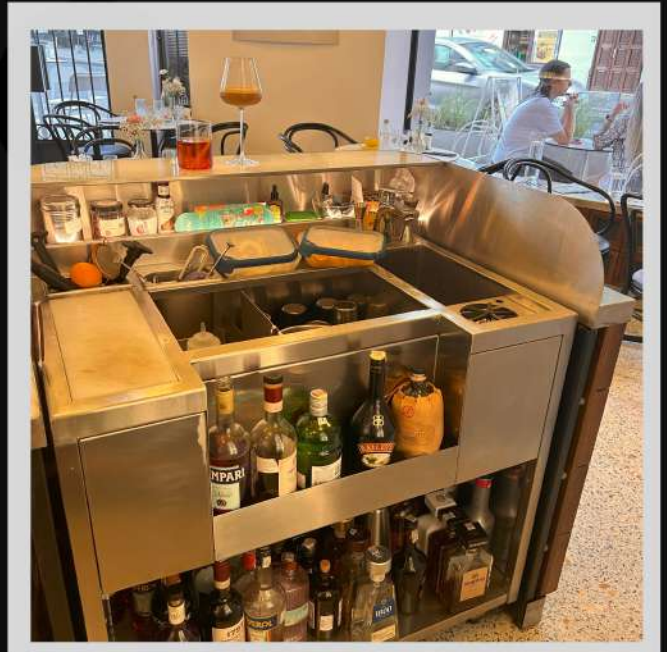

- Three containers can be placed horizontally.

- It's designed to optimize space and organization.

- Plus, there's one fixed container to complete the setup.

Happy Customers

Using our Plus S cocktail station

620

And one more thing:

WE CAN MAKE IT MOBILE

○ The station can be made mobile by incorporating wheels for enhanced mobility. It boasts a sturdy metal framework to support the serving counter, offering a delightful array of customization options tailored to the client's preferences, including the adaptation of the front bar design to perfectly reflect their unique branding identity.
